Vol. 63 Nos. 1/2

Special Issue: The Colloid Chemistry of Silica. A collection of papers presented at the Ralph K. Iler Memorial Symposium on the Colloid Chemistry of Silica, held at the 200th National Meeting of the American Chemical Society, Washington, DC, 26–30 August 1990.

Silanization of oxidized silicon and aluminium surfaces with functionalized silanes with characterization by wettability, ellipsometry, XPS and quartz crystal microbalance studies
K.M.R. Kallury, M. Cheung, V. Ghaemmaghami, U.J. Krull and M. Thompson (Toronto, Ont., Canada) 1
Reactions of titanium tetrachloride with modified silica gel surfaces studied by diffuse reflectance FT-IR spectroscopy
J.P. Blitz (Cincinnati, OH, USA) 11
FT-IR diffuse reflectance study of the adsorption and oxidation of alcohols on porous silica surfaces
T.J. Horr, J. Ralston and R.St.C. Smart (Adelaide, S.A., Australia) 21
Adsorption of biochemically significant phosphates on silica
K. Hamdani and K.L. Cheng (Kansas City, MO, USA) 29
The properties of silica surfaces treated at high pH
S. Kondo and M. Igarashi (Fukui-shi, Japan) and K. Nakai (Osaka, Japan) 33
Photophysical properties of pyrene in zeolites. 3. A direct time-resolved diffuse reflectance study in alkali cation-exchanged zeolites X and Y
K.-K. Iu and J.K. Thomas (Notre Dame, IN, USA) 39
Effect of adsorption of non-ionic surfactant and non-ionic–anionic surfactant mixtures on silica–liquid interfacial properties
P. Somasundaran, E.D. Snell, E. Fu and Q. Xu (New York, NY, USA) 49
Silanisation processes for silica of controlled pore size
P.A. Sermon, M.A. Yates and C.A. Koh (Uxbridge, UK) 55
Mechanisms of preparation of silica supported catalysts
P.A. Sermon and J. Sivalingam (Uxbridge, UK) 59
Gas phase adsorption studies of selected probe molecules on powdered silica polymorphs
Y. Lefebvre and C. Jolicoeur (Sherbrooke, Que., Canada) 67
Silanol chemistry in siliceous faujasite
G.J. Ray, A.G. Nerheim and J.A. Donohue (Naperville, IL, USA), J.A. Hriljac and A.K. Cheetham (Oxford, UK) 77
Investigation of silica surface chemistry by luminescent probes method
A.M. Eremenko, N.P. Smirnova, S.A. Samchuk and A.A. Chujko (Kiev, Ukraine) 83
The structure and properties of the dehydroxylated silica surface: quantum-chemical studies
V.I. Lygin and O.I. Chertihina (Moscow, Russia) 93
IR spectroscopic study of silica–triethylamine interaction
T.I. Titova and L.S. Kosheleva (Moscow, Russia) 97
Heterocoagulation behaviour of polymer latices with spherical silica
K. Furusawa (Tsukuba, Japan) and C. Anzai (Tokyo, Japan) 103
A relation between the amounts of sorbed alkali cations and the stability of colloidal silica
S.K. Milonjić (Belgrave, Yugoslavia) 113

Aggregation/dispersion of amorphous silica particles by simultaneous adsorption of two polymers in an aqueous phase
S. Shimabayashi and K. Nishino (Tokushima, Japan) and M. Nakagaki (Tokyo, Japan) 121
Functionalised spherosilicates: soluble precursors of inorganic/organic hybrid materials
P.A. Agaskar (Blacksburg, VA, USA) 131
The preparation and properties of a fibrous tube alkoxysiloxane derived from a tube silicate
B.A. Harrington and M.E. Kenney (Cleveland, OH, USA) 139
Formation of colloidal silica particles from alkoxides
J.K. Bailey and M.L. Mecartney (Minneapolis, MN, USA) 151
Effect of sol–gel processing on luminescence of Sm-doped silica
A.L. Demskaya, T.I. Prokhorova, S.S. Pivovarov, A.P. Sokolova and V.S. Khotimchenko (St. Petersburg, Russia) 163
Unsupported alkoxide-derived silica membranes
L.C. Klein, T. Bloxom and R. Woodman (Piscataway, NJ, USA) 173
Synthesis of spherical silica particles by spontaneous emulsification
W.T. Minehan and G.L. Messing (University Park, PA, USA) 181
In-situ gelation of silicates in drilling, well completion and oil production
J.K. Borchardt (Houston, TX, USA) 189

Vol. 63 Nos. 3/4

Dihexadecyl phosphate monolayers at the heptane/water interface: model interfacial system for solvent extraction studies
N.F. Zhou and R.D. Neuman (Auburn, AL, USA) 201
A method for selecting a polyvinyl alcohol as stabilizer in suspension polymerization
E. Mendizabal, J.R. Castellanos-Ortega and J.E. Puig (Guadalajara, Mexico) 209
Perfluoropolyether microemulsions: conductivity behavior of three-component W/O systems
A. Chittofrati, A. Sanguineti and M. Visca (Milan, Italy) and N. Kallay (Zagreb, Yugoslavia) 219
Extension of Harkins–Jura adsorption isotherm to solute adsorption
K.P.D. Iyer and A.S. Kunju (Kerala, India) 235
Water-in-crude oil emulsions from the Norwegian continental shelf. 5. A comparative monolayer study of model polymers
K.G.N. Børve and J. Sjöblom (Bergen, Norway) and P. Stenius (Stockholm, Sweden) 241
The charge status of different disperse systems (suspension, paste, powder): its definition by the diffusion potential
M. Tschapek (Buenos Aires, Argentina) 253
Adsorption of protons, Fe(II) and Al(III) on lepidocrocite (γ-FeOOH)
Y. Zhang (Beijing, China), L. Charlet and P.W. Schindler (Bern, Switzerland) 259
The lamellar liquid crystal in the water, non-ionic surfactant and copper nitrate system
S.E. Friberg, A. Amran and C.C. Yang (Potsdam, NY, USA) and J. Sjöblom (Bergen, Norway) 269
Microemulsions as reaction media for immobilization of proteins to hydrophilized surfaces
K. Bergström and K. Holmberg (Stenungsund, Sweden) 273
Improvement in emulsification ease, particle size reduction and stabilization of concentrated fluorocarbon emulsions by small amounts of (D-glucosyl) [2-(perfluoroalkyl)ethyl] phosphates as surfactants
A. Milius, J. Greiner and J.G. Riess (Nice, France) 281
Preconcentration and removal of iron(III) from aqueous media using micellar-enhanced ultrafiltration
E. Pramauro, A. Bianco, E. Barni and G. Viscardi (Torino, Italy) and W.L. Hinze (Winston-Salem, NC, USA) 291
Interactions of a non-ionic surfactant with mixed phospholipid–oleic acid monolayers. Surface potential and surface pressure studies at constant area
M. Casas (Santiago de Compostela, Spain) and A. Baszkin (Chatenay-Malabry, France) 301
Preparation of vitamin E microemulsion possessing high resistance to oxidation in air
Y.C. Chiu and W.L. Yang (Chung-Li, Taiwan) 311
Aggregation of homologous alkyltrimethylammonium thiocyanates and chlorides in chloroform
J. Czapkiewicz and I. Maciejowska (Krakow, Poland) 323

Influence of emulsifier on competitive adsorption of α_s-casein + β-lactoglobulin in oil-in-water emulsions
E. Dickinson and J.L. Gelin (Leeds, UK) 329

Brief Notes

Preparation of monodispersed colloidal gold by reduction of $AuCl_4^-$–cationic surfactant complexes
H. Ishizuka, T. Tano, K. Torigoe, K. Esumi and K. Meguro (Tokyo, Japan) 337
The number of degrees of freedom for two-component solid–liquid–vapour capillary systems under external interactions
D. Li and A.W. Neumann (Toronto, Ont., Canada) and J.A. Mann (Cleveland, OH, USA) 341
